

SAPRIN releases Individual Surveillance Episodes 2023 Datasets

April 2024

Mortality rates above for the 3 nodes are an example of available data for analysis

The SAPRIN Individual Surveillance Episodes 2023 Datasets were released in January 2024 and are available to parties interested in utilizing the data. It contains demographic surveillance data from 1 January 1993 to 31 December 2022 for Agincourt, Dimamo and AHRI HDSS nodes.

The South African Population Research Infrastructure Network (SAPRIN) is a national research infrastructure funded through the Department of Science and Innovation and hosted by the South African Medical Research Council. One of SAPRIN's initial goals has been to harmonise and share the longitudinal data from the three current Health and Demographic Surveillance System (HDSS) Nodes.

These long-standing nodes are the MRC/Wits University Agincourt HDSS in Bushbuckridge District, Mpumalanga, established in 1993, with a current population of 105 461 people; the University of Limpopo DIMAMO HDSS in the Capricorn District of Limpopo, established in 1996, with a current population of 99 741; and the Africa Health Research Institute (AHRI) HDSS in uMkhanyakude District, KwaZulu-Natal, established in 2000, with a current population of 153 410.

This dataset represents a snapshot of the continually evolving data in the underlying longitudinal databases maintained by the SAPRIN nodes.

The dataset can be accessed via this link - <https://saprindata.samrc.ac.za/index.php/catalog/85>
