

C-SHARP node registers 100,000 individuals

June 2025

Earlier this year the C-SHARP node reached a significant milestone, the registration of 100,000 individuals, reached on the CHAMP app, an innovative tool for community health workers working within the two communities of Nomzamo and Bishop Lavis under the C-SHARP HDSS node. On the 14th of March a celebratory event saw C-SHARP consortium partners, funders, and community members from Nomzamo and Bishop Lavis gathering under the inspirational theme, *"From Nomzamo to Bishop Lavis – 100k Stories, One Future."*

The guests were treated to a lively celebration, including live mural painting choreographed by Visual Artist Lee and students from the local schools and a festive braai with music provided by a DJ. The mural was a vibrantly symbolic depiction of harmony and advancement, encapsulating the experience of the communities as a whole towards improved health. This success highlights the tremendous potential of collaboration in changing lives and creating a healthier tomorrow for everyone.
